EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below.

IN THE CLAIM:

1. In claim 1, lines 1-2 "*2-chloro-1,1,1,3,3,3-heptafluoropropane*" has been corrected to -- 2-chloro-1,1,1,2,3,3,3-heptafluoropropane --.

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Heiser on 10/3/2005.

The following is an examiner's statement of reasons for allowance:

The prior art (WO99/51553 & EP 0434409) also teach a process for preparing 2-chloro-1,1,1,2,3,3,3-heptafluoropropane. The EP 0434409 reference discloses the use of a chromium oxide based catalyst containing copper, nickel and alkali metals. The WO 99/51553 discloses the use of trivalent chromium catalyst. The difference between the prior art and the claimed invention is that the claimed process requires at least one chromium-containing component selected from (i) a crystalline alpha-chromium oxide where at least 0.05 atom % of the chromium atoms in the alpha-chromium oxide lattice are replaced by nickel, trivalent cobalt or both nickel and trivalent cobalt, provided that no more than 2 atom % of the chromium atoms in the alpha-chromium oxide lattice are replaced by nickel and that the total amount of chromium atoms in the alpha-chromium

oxide lattice that are replaced by nickel and trivalent cobalt is no more than 6 atom % ,
and (ii) a fluorinated crystalline oxide of (i).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
